DETAILED ACTION

Allowable Subject Matter

Claims 1-20 and 32-34 are allowed over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter: Applicant has claimed uniquely distinct features a markup language file associated with a script handler and loadable by the browser instance, the script handler executable to process multimedia data received from the source for presentation to the user interface and control playback of the multimedia data by the source based on user interaction with the user interface. These features are not found or suggested in the prior art.

The closest prior arts, Peyer and Doyle discloses a conventional browser adapted to establish browser instance having user interface to display a representation of the multimedia data; either singularly or in combination, fail to anticipate or render the above limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
